About Me

Software Engineer with hands-on experience building real-world applications using **Flutter**, **React.js**, **Next.js**, and **TypeScript**. I actively integrate various **AI APIs** into production applications and apply **prompt engineering** to get optimal results from any AI model. I focus on writing clean, structured code and delivering user-friendly products — from cross-platform mobile apps to intelligent Telegram bots.

Projects

Linguo AI — Language Learning Platform — [Live Link](#)

- Built a **cross-platform** application (Mobile & Windows) using **Flutter** and **Dart**.
- Integrated **Gemini API**, **OpenAI API**, and **Whisper** for AI-powered subtitles, speech recognition, and conversation practice.
- Implemented **Firebase** for authentication, real-time database, and cloud storage.
- Designed a seamless UX for learning languages through movies and real content.

@LinguoSaveBot — Telegram Video Downloader Bot — [Live Link](#)

- Developed a feature-rich Telegram bot using **Node.js** and **TypeScript** that downloads videos and audio from social media platforms.
- Supports **Instagram**, **YouTube**, **TikTok**, **Twitter**, and more with quality selection up to **4K**.
- Deployed with **Docker** and Local Bot API Server enabling **2GB file uploads**.

LearnUp: Online Courses — *In Progress* — [Live Link](#)

- Building an e-learning platform with **Next.js**, **TypeScript**, and **MongoDB**.
- Features user authentication, **Stripe** payment processing, and multilingual content support.
- Integrating AI-powered learning tools for enhanced user experience.

Education

Najot Ta'lim Training Center (2024-12-20 – 2025-04-20)

- Software development program focused on **Web & Mobile technologies**.
- Worked on real-world projects including AI integration.

Fergana State Technical University (2024-09-20 – present)

- Bachelor in Cybersecurity Engineering.
- Learning modern software engineering principles.

Skills

Core Technologies: Flutter & Dart • JavaScript & TypeScript • Python • Node.js

Frontend & Web: React.js • Next.js • Tailwind CSS • ShadcnUI

AI & APIs: Gemini API • OpenAI API • Whisper • Prompt Engineering

Backend & Tools: Firebase • MongoDB • Docker • Git & GitHub

Soft Skills: Teamwork & Communication • Adaptability • Problem-solving
